

Reusable Laparoscopic Scissor System

The SHARPEST blade every time

Clinical feedback of reusables combined with the safety and sharpness of a disposable

- New scissor with each procedure
- Ergonomic reusable handle improving tactile feel for surgeons
- Eliminate risks of bioburden and cross-contamination with new scissor shaft every time
- Strong economic value proposition
- Single use shaft provides new insulation for each patient and eliminates the need for testing and maintenance vs. disposable tip systems

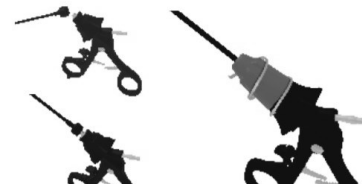

Features

Reusable

Single-use
